**ADDITIONAL DESCRIPTION:**

The 90's was a colorful time where flat, geometric scribbles, and neon burst of popping color clashed so badly - it somehow worked, in an ironic way.

The 90's were also a time of cheesy tunes and terrible hair styles. Where analog tech met new digital revolutions; we used Game-boys to play hours of simple games like Tetris while still winding up cassettes tapes with pens and pencils.

Personally, we love the naughty 90's for all its flaws, fashions and flavors. We dreamed of having a fun, bright and 90's inspired game to play while killing time at school or on a train. So we decided to make our first ever mobile game, Vector Pop! We hope you guys enjoy playing it as much as we do!

Remember, the game is best experience listening to 90's Dance Music See Spotify playlist.

Indie Games For Art's Sake

Once I disappeared, and I crawled around in the dark for a bit. But the worst part was that I didn't know it was dark. As far as I could see all the lights were switched on. That is worst part of it all, because I could exist in this dark and not even know I was there.

Doodle with Date Ltd is an indie-game start-up making games for art's sake, creative indulgence, and just for fun. Doodle is the maker and designer who has teamed up with Date, a far better and more meticulous game developer. [Vector Pop](#) is the first game by Doodle with Date.

### **BIO:**

#### **Bez Judius**

Game Maker and Designer

Bez is just trying to make this simulation reality we are living in a little more obtuse and fun. Bez is from a design background including art, film and music production with a slanted influence from a darker strand of creativity. As a means of learning by completion, Bez anguishes on finishing projects from their doodles,. He has a love for games, people, design, and semantics.

#### **Hlib Rubanskyi**

Game developer

You could say Hlib hasn't left his childhood, as he still spends most of his days in the company of videogames.

Only now Hlib doesn't just play them, he creates them.

Hlib has been working as a full-time freelance game developer for more than 3 years,

Mixing his childhood passion with industry insight to create unique and interesting games.
